CONTROL ELEMENTS FOR MOBILE MACHINES

Dynamic Keypad

Dynamic UX

Vision Wheel

Joystick Encoder

DYNAMIC KEYPAD

A few buttons - infinite possibilities

- Reduction of buttons through dynamic symbols
- No scattered buttons in different locations

Leaner work environment

- Clear function assignment thanks to intuitive dynamic symbols and colours
- Rarely used functions are available dynamically as required
- Mapping of push-button, latching and analogue functions
- Customisable user profiles

Expandable scope of functions in the vehicle

- Functions on demand
- Upgrading the vehicle with additional modules

VISION WHEEL

Ideal addition to the Dynamic Keypad

- Intuitive ergonomic operation
- Simple sorting of Dynamic Keypad functions into categories
- Ideal visualisation

Central control element

- Replacement for analogue functions such as idle throttle

Streamlined working environment

- Clear function assignment thanks to intuitive dynamic symbols and colours
- Dynamic and customised work environment
- Customisable user profiles

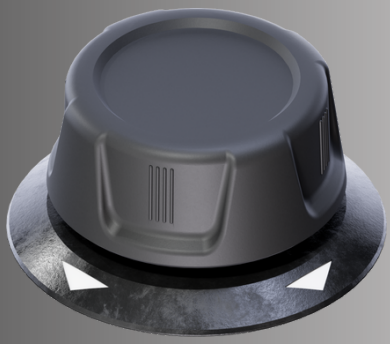
JOYSTICK ENCODER

Ideal addition to the Dynamic Keypad

- Central control element
- Joystick for turning and pressing
- Navigating through complex display menus
- Ergonomic design

Ideal for rough environments

- Robust mechanics
- For example, for construction machinery, agricultural machinery and municipal vehicles



DYNAMIC UX

Combination of Dynamic Keypad
with Vision Wheel or Joystick Encoder

Vision Wheel and Joystick Encoder
also available as Stand-Alone Devices
